

The official newsletter of DESEM project

The most important updates of the project implementation

Due to the coronavirus pandemic, quarantine has become a real challenge. Given the situation, the project coordinator, together with the partners, found the best ways to adapt to the new challenges. It was decided to continue the project implement (mobilities and activities) to remotely via virtual communication channel.

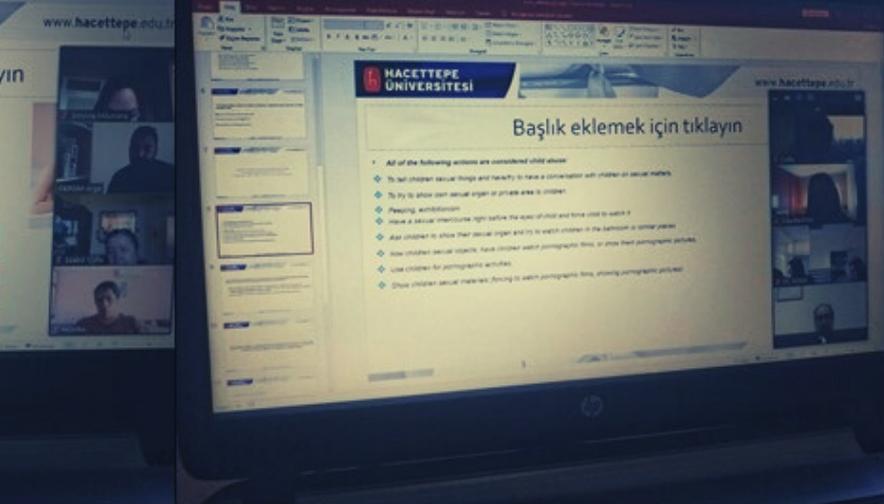

Given the difficult situation the methodologies were developed in September. Project outputs: Framework program for caregivers; Framework program for Teachers; Activity book for teachers; Activity book for caregivers/parents; Teachers Guide Book; Visual training tool for disabled. The developed methodologies allowed to start training courses (LTTA).

The first LTTA

The first LTTA started on 14 th-18 th of September. The target group of the first LTTA was special education teachers, guidance teachers and social workers. 30 participants from 6 countries: Turkey, Hungary, Lithuania, Greece, Spain, Italy, deepened their knowledge in these topics: supportive studies to privacy acquisition; supporting independency in self care skills; stages of adolescent development and its relationship with other development areas; what is the trust circle; Why it's necessary; How it's created; using the trust circle; coping skills with inappropriate requests for abuse; prevention of neglect / abuse; neglect / abuse prevention and intervention methods; preparation of individualized education plan by considering development.

A look inside
this issue:

LTTA - 2

There is so much wonderful information out there! Just visit: www.desemproject.eu

The online transnational meeting

All mobilities during the pandemic were terminated and recognized as force majeure. For the successful implementation of the project and coordination of activities, an online meeting was organized with all project partners, during which important issues were discussed. The decisions made helped to organize LTTA trainings and to prepare the final methodological tools.

The implementation of the project is coming to an end, the e-learning platform will be ready very soon, also waiting dissemination activities of the project and sharing of good practice.

The second LTTA

The second LTTA started on 13th-15th of October. The training program of the Neglect- Abuse Prevention and Privacy Training for Intellectually Disabled Individuals was for Caregivers & Parents.

Training members studied these topics: How to teach individuals with disabilities to form the trust circle? How to cope with adolescent development problems at home? How to teach individuals with disabilities coping skills with inappropriate requests for abuse?

Many thanks to all participants!

During the course, participants developed new skills and abilities, had the opportunity to take full advantage of the virtual learning environment in the implementation of project activities.
